

Our curing systems
for thermoset resins

Nouryon

Nouryon is your partner in essential solutions for a sustainable future

Nouryon is a global, specialty chemicals leader. Markets and consumers worldwide rely on our essential solutions to manufacture everyday products, such as personal care, cleaning goods, paints and coatings, agriculture and food, pharmaceuticals, and building products. Furthermore, the dedication of more than 7,900 employees with a shared commitment to our customers, business growth, safety, sustainability and innovation has resulted in a consistently strong financial performance. We operate in over 80 countries around the world with a portfolio of industry-leading brands.

Throughout our history, we built up a wealth of expertise, forged long-term partnerships, and earned a place among the best performing companies in our industry. Now that we're Nouryon, we're putting even greater focus on what it takes to be a global specialty chemicals leader

We are a responsible organization that takes its obligations seriously – to the planet, to our customers and to our own people. We believe the only way to grow is by developing sustainable, innovative solutions that benefit our customers and we're constantly looking for ways to reduce our impact on the environment.

Within our Polymer Specialties business, we produce everyday essentials for the global polymer and electronics industries. We are among the world's leading producers of organic peroxides, metal alkyls, organometallic specialties and polymer additives, which are essential ingredients for the thermoplastic, composite and rubber industries. We are widely known for our world-class products, including Trigonox®, Butanox®, Cadox®, Perkadox® and Ketjenblack® brands.

Perkadex®
Trigonox®

As a innovative company, we have a stream of new, high-value products to maintain our leadership. Recently we have introduced cure systems based on copper and iron sold as Nouryact® which are targeted for a long term sustainable alternatives to Cobalt. Interestingly, our Nouryact® accelerators proved to be non-sensitive to the presence of water in a cure system and therefore allow for using wet (i.e. non-dried) fillers. This is of particular interest when using biofibers which carry high amounts of water that hampers the cure of traditional Cobalt based cure systems.

We've also led the way with new peroxide formulations. Such as Perkadox® 16-40XPS, a pumpable paste-form of peroxydicarbonate which offers savings in operational costs as the peroxide dissolves in less than a minute in the UP or acrylic resin. The product can ideally be used in combination with liquid dosing pumps in applications like RTM, CIPP and pultrusion processes.

A global partner

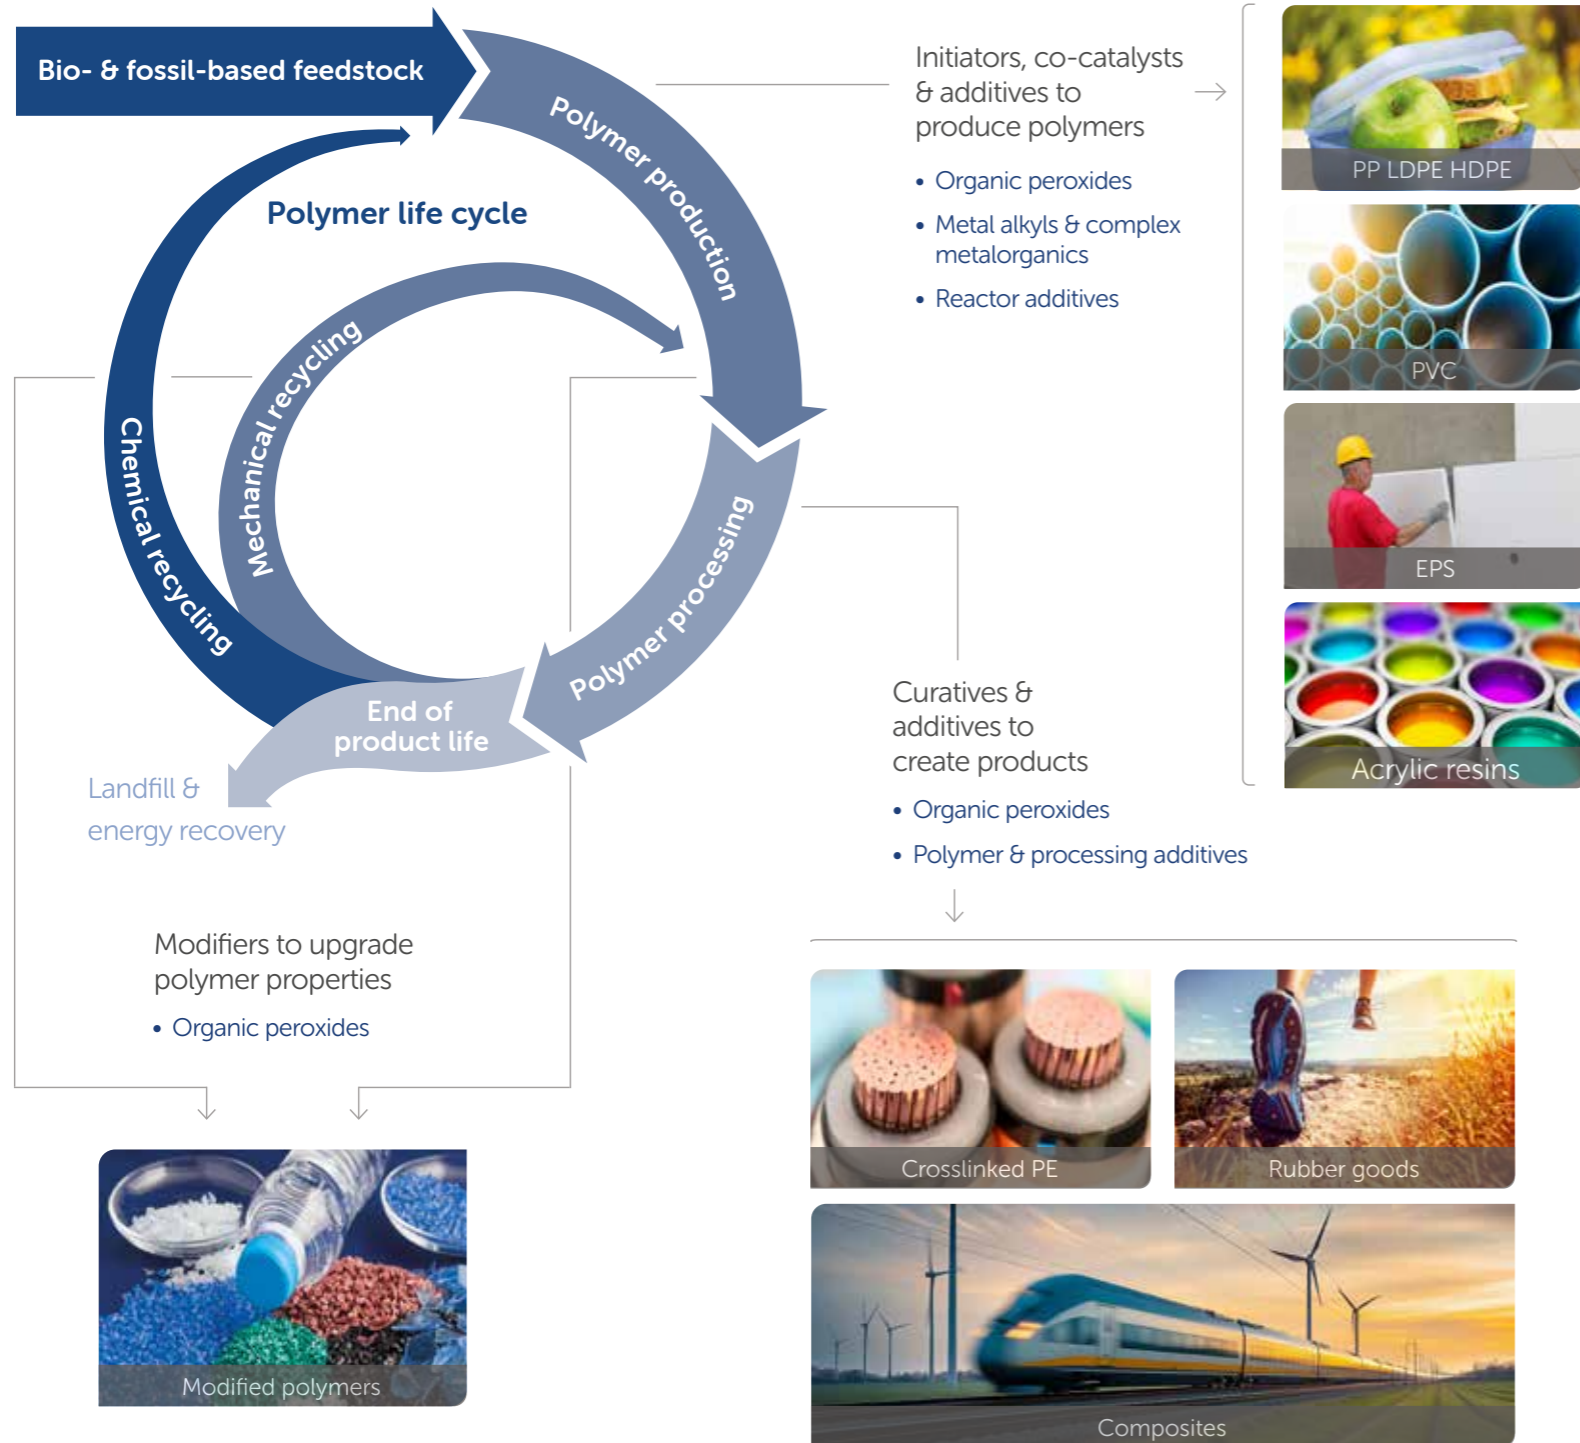

Our manufacturing sites and distribution centers are found all around the globe. Our global distribution network allows us to deliver our products to you anywhere in the world. That's how we ensure security of supply and easy access to quality products wherever you are.

All our sites are ISO 9001 and ISO 14001 certified to ensure the highest product quality and strict compliance with environmental regulations. We continually invest in manufacturing techniques, high quality standards, safety, innovation, active technical support and a reliable supply chain.

Empowering the polymer cycle

We empower the polymer cycle through a sustainability-driven strategy, offering essential ingredients that enhance this cycle.

Nouryon

Your partner in essential solutions for a sustainable future

Our Sustainability Ambition

We partner with our customers, suppliers and employees to deliver innovative solutions, drive progress and create a safe and sustainable today and tomorrow for everyone.

Our Commitment to a Sustainable Future

WE EMPOWER AND ENGAGE

We empower our employees and engage with our suppliers and communities to deliver a positive impact

WE INNOVATE AND GROW

We enable growth by meeting customer demand for innovative and sustainable solutions

WE OPERATE RESPONSIBLY

We enhance operational excellence and efficiency to continuously improve our safety and environmental performance

Innovation

Our manufacturing sites and distribution centers are found all around the globe. Our global distribution network allows us to deliver our products to you anywhere around the world. That's how we ensure security of supply and easy access to quality products wherever you are.

Our thorough understanding and knowledge of free radical chemistry and thermoset technology is the basis for the development of innovative and sustainable products, designed with you in mind.

As a innovative company, we have a stream of new, high-value products to maintain our leadership. Recently we have introduced cure systems based on copper and iron sold as Nouryact which are targeted for a long term sustainable alternatives to Cobalt. Interestingly, our Nouryact accelerators proved to be non-sensitive to the presence of water in a cure system and therefore allow for using wet (i.e. non-dried) fillers. This is of particular interest when using biofibers which carry high amounts of water that hampers the cure of traditional Cobalt based cure systems.

We've also led the way with new peroxide formulations. Such as Perkadox® 16-40XPS which is a pumpable paste-form of peroxydicarbonate which offers savings in operational costs as the peroxide dissolves in less than a minute in the UP or acrylic resin. The product can ideally be used in combination with liquid dosing pumps in applications like RTM, CIPP and pultrusion processes.

On top of our innovative products we have an obligation to keep strengthening our existing portfolio such as Nouryon's Butanox® M-50 peroxide, the global standard for MEKP. This low water content methyl ethyl ketone peroxide contains no polar components and is the best possible answer to the problem of osmosis in boat building.

In addition, we provide safety and technical support from our fundamental peroxide R&D laboratories in Deventer - The Netherlands, plus manufacturing & support in Pasadena (TX) - USA, Los Reyes - Mexico, and Tianjin - China.

Our researchers are based in dedicated customer-focused business teams. They perform research, product and process development and technical support to translate market needs into new innovative products. They understand the needs of our customers and are committed to their success.

Online safety training for the Thermoset industry

We offer an interactive E-learning module with certification in 12 languages to all our customers. Please ask your Nouryon representative to be enrolled to the course.

Your safety is our priority

Nouryon is recognized as the global leader in organic peroxide safety. Our proven success in safely handling organic peroxides is due to our long-term commitment to developing and maintaining high safety standards. At Nouryon we always place safety as our top priority.

Sharing our experience in safety is one of the most important resources we offer. Through our safety programs we provide expert advice on the handling of our products including:

- classroom review of how to safely handle organic peroxides
- consultation on storage and dosing facility design
- demonstrations on the safe use, handling and control of organic peroxides
- online E-learning module on safe handling and use of organic peroxides

Our Safety Research Laboratory in Deventer, The Netherlands is heavily involved in R&D, ensuring the development of safe products and processes. Studies are carried out, to provide a high level of safety in the manufacturing, handling and transport of dangerous goods.

In general, organic peroxides are thermally unstable components which can decompose at relatively low temperatures. However, knowledge of proper handling techniques, carefully designed facilities and thorough training of personnel can overcome the hazards. Personnel who understand and pay proper attention will be better able to handle organic peroxides confidently and safely.

Storage temperatures

SADT: Self-Accelerating Decomposition Temperature

The SADT is the lowest temperature at which self-accelerating decomposition may occur with a substance in the packaging as used in transport. Transportation temperatures are derived from the SADT according to the recommendations by the United Nations Committee of Experts on the Transport of Dangerous Goods.

T_s max.

The T_s max. given in the product list on pages 10-14 is the recommended maximum storage temperature at which the product is stable and quality loss will be minimal.

T_s min.

A minimum storage temperature (T_s min.) is given if phase separation, crystallization or solidification of the product is known to occur below the temperature indicated. We recommend that you store the product above the T_s min. indicated for quality and in some cases safety reasons.

T_{em} : Emergency temperature

The T_{em} is derived from the SADT and is the temperature at which emergency procedures must be triggered.

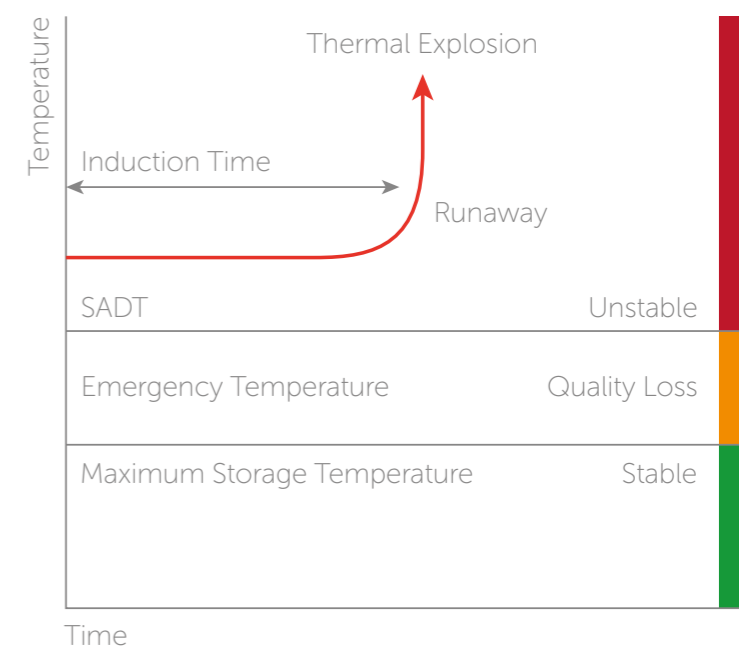

T_c : Control temperatures

The T_c is also derived from the SADT and is the maximum temperature at which the product can be safely transported. A T_c is not required if the SADT exceeds 50°C.

Both the T_{em} and T_c are related to safety and do not relate to product quality. To maintain product quality the recommended storage temperatures (T_s min. and max.) should be observed.

UN numbers / NFPA classification

UN Numbers

All products accepted for transport are assigned to generic entry numbers according to classification principles as described in the recommendations by the United Nations Committee of Experts on the Transport of Dangerous Goods. An explanation of all relevant UN numbers is given in table 1.

Table 1. UN numbers

UN no.	Classification	Nouryon hazard rating	Maximum container size
Organic peroxides			
3102	type B; solid	Very high	25 kg (55 lb)
3103	type C; liquid	High	50 kg (110 lb)
3104	type C; solid	High	50 kg (110 lb)
3113	type C; liquid, temperature controlled	High	50 kg (110 lb)
3114	type C; solid, temperature controlled	High	50 kg (110 lb)
3105	type D; liquid	Medium	50 kg (110 lb)
3106	type D; solid	Medium	50 kg (110 lb)
3115	type D; liquid, temperature controlled	Medium	50 kg (110 lb)
3116	type D; solid, temperature controlled	Medium	50 kg (110 lb)
3107	type E; liquid	Low	400 kg (880 lb)
3108	type E; solid	Low	400 kg (880 lb)
3117	type E; liquid, temperature controlled	Low	400 kg (880 lb)
3109	type F; liquid	Very low	IBC's / Tanks
3110	type F; solid	Very low	IBC's / Tanks
3119	type F; liquid, temperature controlled	Very low	IBC's / Tanks
Self-reactive substances			
3234	type C; solid, temperature controlled	High	50 kg (110 lb)
3236	type D; solid, temperature controlled	Medium	50 kg (110 lb)

NFPA Class

The NFPA Code 400, Hazardous Materials Code for the Storage of Organic Peroxides Formulations is set by the US National Fire Protection Association to provide enhanced fire protection and storage requirements for organic peroxides.

The system is based on the behavior of certain specific formulations in their US Department of Transportation- or Canadian Ministry of Transport-approved shipping containers and under conditions of fire exposure.

As one of the US recognized standards, we have included all classifications that were available at the time of publication of this product catalog. We encourage you to obtain a copy NFPA Code 400 from the NFPA website at www.nfpa.org.

NFPA classification system for organic peroxide formulations

Class I	Formulations that are capable of deflagration but not detonation.
Class II	Formulations that burn very rapidly and that present a severe reactivity hazard.
Class III	Formulations that burn rapidly and that present a moderate reactivity hazard.
Class IV	Formulations that burn in the same manner as ordinary
Class V	Formulations that burn with less intensity than ordinary combustibles or do not sustain combustion and that present no reactivity hazard.

Packaging

We offer a variety of packaging options for both liquid and solid organic peroxides. The maximum package size for each organic peroxide is regulated by the United Nations, based on the hazard classification of the peroxide as shown in table 1 on page 6.

Liquid organic peroxides

Liquid peroxides from Nouryon are available in packages shown in table 2.

We also understand the need to innovate our packaging. Our Nourytainer® HDPE can is recognized as the world's benchmark container for liquid organic peroxide handling. We are continually looking for new ways to optimize safe transport, handling and storage of organic peroxides.

Table 2. Standard packages for liquid peroxides

Package	Volume	Net weight	Comments
Bottle	3.8 liter (1 gallon)	3.2-3.6 kg (7-7.9 lb)	packaged as 4 polyethylene bottles per non-returnable carton
Pail	18.9 liter (5 gallon)	20.4 kg (45 lb)	polyethylene bucket
HDPE can	20-30 liter (5.3-7.9 gallon)	15-25 kg (33-55 lb)	single component, polyethylene container (Nourytainer®)
Drum	57-208 liter (15-55 gallon) 208 liter (55 gallon) 208 liter (55 gallon)	45-204 kg (99-450 lb) 159 kg (350 lb) 186 kg (410 lb)	lined steel drum fiber drum polyethylene drum

Table 3. Standard packages for solid and paste-form peroxides

Package	Net weight	Comments
Carton	varies with product	polyethylene bags inside non-returnable cardboard box
Drum	20-25 kg (44-55 lb)	fiber drum

Solid organic peroxides

Standard packages for our solid and paste-form peroxides are shown in table 3.

For the availability of our products in non-standard packages, please consult your Nouryon account manager.

Nourytainer® HDPE can

Leading the way in safety

We are recognized as the global leader in organic peroxides. We always place safety as our top priority. Safety does not stop with our chemicals. As a company of innovation, we also understand the need to innovate our packaging. Our Nourytainer® HDPE can for example, the benchmark in safe handling, transport and storage of liquid organic peroxides.

We offer a variety of packaging options for both liquid and solid organic peroxides.

Enhanced advantages and safety features

- Easy operating, screw cap anti-glug device
- Ergonomically designed handle for ease and safety of handling
- Opaque exterior to protect contents from harmful UV rays
- Shaped for promotion of optimal air circulation while stacked
- Unique interior features allow more complete drainage

Ventilation screw-cap to prevent splashing

4 interlocking points for improved stacking stability

2 types of caps

Made of 100% HDPE

Unique design that makes it fully drainable

Profile ribs on each corner to improve strength

Grip-aid in the bottom for easy handling

2 special caps
Depending on the type of organic peroxide,
we have developed special caps to meet
all safety requirements

Venting cap
Membrane type

Standard cap
Closed cap type

Size
20 liter: 324x324 mm
30 liter: 337x424 mm

Stable palletizing
4 interlocking points
to improve palletizing

Palletization on pallets
of 1000x1200mm:
20 liter: 36 per pallet
30 liter: 24 per pallet

Ventilation
Temperature control is vital.
Our Nourytainer is designed
to have optimal air circulation
when stacked.

Directives for the safe handling and storage of organic peroxides

Storage

Organic peroxides should be protected against all sources of heat, even direct sunlight. Storage together with other chemicals, especially accelerators, other reducing materials and inflammable products must be avoided.

Handling

Fire hazard

No smoking, no naked lights, no sparks, or other sources of ignition.

Explosion hazard

Avoid direct contact of organic peroxides with accelerators - add each component separately to the resin. Contamination with dust, heavy metals and their compounds, as well as chemicals in general, should be avoided.

Eye and skin injury

Always wear safety goggles and protective gloves, since organic peroxides have a corrosive effect on eyes and skin.

Additional information

On request we also provide specific publications on the use and the safe handling and storage of our products.

our safety services

Butanox[®] M-50

Track record of 60 years consistency

Nouryon is home to the best-known ketone peroxide brand, Butanox[®] M-50, the work horse of the thermoset composites industry. The material was introduced to the Thermoset composited industry in the 1960's and ever since has been the reference grade for MEKP's. The quality of Butanox[®] M-50 peroxide is outstanding and is the product of choice for most composite applications, such as boats, pipes, engineered stone, gelcoats and others.

Quality in every step we take

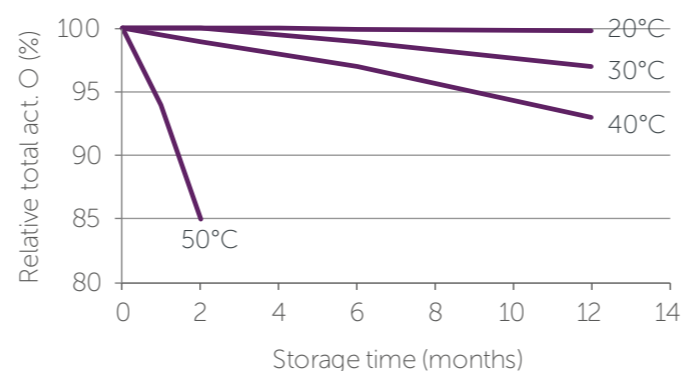

Our customers need to be able to rely on a cure system with reproducible consistent performance. They know Butanox[®] products are the safe choice for more than 60 years.

Manufacturing a safe and high-quality ketone peroxide with consistent curing performance requires a lot of dedication and attention to detail. From the automated process to the raw materials used through the packaging and quality control systems employed we have mastered the art of producing consistent quality.

Butanox[®] is produced without additives and the absence of polar solvents making Butanox[®] suitable for the most demanding applications, such as gelcoats. We pride ourselves on being so reliable in quality that many UP Resin manufacturers use our Butanox[®] products as the calibration standard to set the reactivity of their resins.

Storage stability

The quality composition of Butanox[®] M-50 peroxide provides excellent storage stability which supports sales across the globe including areas with high ambient temperatures such as the Middle East. The higher temperatures in certain areas have limited effect on the quality as shown in stability graph below.

When kept according to recommended storage conditions, the products will remain in specifications for an extended time. Even if the product is exposed to slightly higher temperatures for a limited amount of time there is limited influence on the stability. The graph below is representative for Butanox[®] M-50 product not for competitor's MEKP grades in the market.

Butanox[®]

Vanishing Red (VR), seeing is believing

Our Vanishing Red curing systems allows you to monitor the curing process without the disadvantages of red peroxides which stay red. With VR, you can visually monitor curing conditions to improve efficiency and reduce cycle times.

The Vanishing Red series of organic peroxides includes a red indicator system that literally disappears in front of your eyes. The red color vanishes during the cure and is only there when you need it to monitor. When the red color has completely disappeared, it is safe to demold the fully cured part.

Advantages include:

- Monitoring flow of peroxide in the dosing lines
- Monitoring of the cure progress
- Visualize hot (peroxide or resin rich) and cold spots
- Visualize thermal effects (heat sink) from core materials

In addition they

- Check on initiator presence in the resin
- Check on good mixing of peroxide in the resin
- Helps to identify dead flow zones in the mold

Scan QR code to check our video on Vanishing Red

Perkadox[®] GB-50L

—

Our innovative phthalate free
Benzoyl Peroxide (BPO) powder

- Produced in North America
- Phthalate free
- Typical applications:
 - Road marking, flooring, and sealants
 - Mine bolts and chemical anchors
 - Acrylic composites
 - Pultrusion

Hydroperoxides													
Cumyl hydroperoxide (80-15-9)													
TRIGONOX 239	46	4.8	in solvent mixture	25 (77)		166 (331)	195 (383)	55 (131)	135 (275)	III*	3109	medium	pre-promoted CHP for VE resins
TRIGONOX K-90	90	9.5	solution in aromatic solvent mixture	40 (104)	-30 (-22)	166 (331)	195 (383)	70 (158)	135 (275)	III	3109	low	standard CHP

* Estimated from NFPA 400 based on similar formulations

Our curing agents

Chemical name [CAS no.]	Assay (%)	Active oxygen (%)	Physical form	Storage temperatures		Half-life temperatures		SADT	Activation temp	NFPA Class	UN no.	Reactivity	Features
Product name				T _s max. [°C(°F)]	T _s min. [°C(°F)]	1.0 hr [°C(°F)]	0.1 hr [°C(°F)]	[°C(°F)]	[°C(°F)]				
tert-Butyl hydroperoxide [75-91-2]													
TRIGONOX A-W70	70	12.4	solution in water	35 (95)	0 (32)	185 (365)	207 (405)	80 (176)		IV	3109	low	standard for adhesives
1,1,3,3-tetramethylbutyl peroxy-2-ethylhexanoate													
TRIGONOX 421	90	5.87	solution in water	5 (49)	-20 (4)	109 (228)	88 (190)	30 (86)		IIa	3115	medium	for acrylate/methacrylate
Peroxy(di)carbonates													
Di(4-tert-butylcyclohexyl) peroxydicarbonate [15520-11-3]													
PERKADOX 16	96	3.9	powder	20 (68)		64 (147)	82 (180)	40 (104)	40 (104)	I	3114	high	best all around primary
PERKADOX 16-GB70	70	2.81	powder	20 (68)		64 (147)	82 (180)	40 (104)		IIb	3116	high	easy to dissolve powder
PERKADOX 16-40 XPS	40	1.55	paste	20 (68)		64 (147)	82 (180)	45 (113)	40 (104)	IV	3116	high	pumpable paste
Di(2-ethylhexyl) peroxydicarbonate [16111-62-9]													
TRIGONOX EHP-CH75	76	3.5	solution in odorless mineral spirits	-15 (5)	-25 (-13)	64 (147)	82 (180)	5 (41)	40 (104)	IIa	3115	high	primary, needs cold storage
TRIGONOX EHPTS	96	4.4	stabilized	-5 (23)		64 (147)	83 (181)	15 (59)	40 (104)		3113	high	safer primary, cold storage
Dimyristyl peroxydicarbonate [53220-22-7]													
PERKADOX 26	96	3.0	flakes	15 (59)		65 (149)	84 (183)	35 (95)	45 (113)	III	3116	high	alternate primary option
tert-Butylperoxy 2-ethylhexyl carbonate [34443-12-4]													
TRIGONOX 117	95	6.2	liquid	20 (68)		117 (243)	137 (279)	60 (140)	80 (170)	IIa	3105	low	higher efficiency
tert-Butylperoxy isopropyl carbonate [2372-21-6]													
TRIGONOX BPIC-CH75	75	6.8	solution in odorless mineral spirits	25 (77)	-20 (-4)	117 (243)	137 (279)	70 (158)		IIb	3103	low	most efficient styrene scavenger
Others													
2,2'-Azodi(isobutyronitrile) [78-67-1]													
PERKADOX AIBN	98		solid	25 (77)		82 (180)	101 (214)	50 (122)			3234	high	special purpose azo initiator for acrylics
2,2'-Azodi(2-methylbutyronitrile) [13472-08-7]													
PERKADOX AMBN	98		solid	25 (77)		84 (183)	104 (219)	45 (113)			3236	high	special purpose azo initiator for acrylics

Auxiliaries

Product name	Chemical name [CAS number]	Assay (%)	Physical form	Standard package
Cobalt-free accelerators				
NOURYACT CF12N	Copper complex [142-71-2]		in solvent mixture	25 kg HDPE can
NOURYACT CF30	Iron complex		in solvent mixture	25 kg HDPE can
NOURYACT CF40	Iron complex		in hydroxyethylmethacrylates (HEMA)	25 kg HDPE can

Auxiliaries may be available upon request.

Perkadox[®] L-40 RPB

—
Marking the future ahead with our
new BPO formulation

- 40% BPO (benzoyl peroxide) content
- Smooth suspension with very fine BPO particles
- Pumpable and easily sprayable
- Specially developed for 98/2 ratio high pressure spraying systems
- Tested and approved by road marking equipment manufacturers
- Typical applications:
 - Road marking, flooring, and sealants
 - Mine bolts and chemical anchors
 - Acrylic composites
 - Pultrusion
