

Eka HP F (Food Contact Grade)

Hydrogen Peroxide

Eka® HP F (Food Contact Grade) hydrogen peroxide is a clear, colorless and aqueous solution. It is available in a number of different concentrations. Please contact your Nouryon representative to determine which product meets your requirements.

CAS number
7722-84-1

Molecular weight
34.02

Applications

Eka® HP F is a high purity, food contact grade hydrogen peroxide also suitable for use in the aseptic packaging industry. This hydrogen peroxide grade is suitable for food contact applications where the requirements of the FDA Food Chemical Codex standard are required. Contact your Nouryon representative to ensure that you obtain the correct product for your particular application.

Packaging and transport

Please refer to the current SDS for the latest transportation regulations for hydrogen peroxide. Eka® HP is classified as dangerous goods and consequently transportation and packaging design must therefore adhere to all applicable transportation regulations. Bulk shipments of hydrogen peroxide are available in tank trucks, rail car or ISO containers. Transportation may take place by road, railway or sea.

Safety and handling

Please refer to the current SDS (Safety Data Sheet) for preventive protection and first aid response. Hydrogen peroxide is a very reactive oxidizing chemical and must be handled carefully. Solutions should be stored in their original containers until ready for use. Hydrogen peroxide must never be returned to its original container or tank once it has been removed. Hydrogen peroxide is neither flammable nor combustible but can sustain combustion. All equipment that come into contact with hydrogen peroxide must be extremely clean and made of compatible materials such as glass, stainless steel, aluminum or HDPE. Hydrogen peroxide must never be placed in a closed, unvented container or pipe. Additional information on the handling of Eka® HP is available in the Hydrogen peroxide product information manual that can be obtained from your Nouryon representative.

Mandatory protective equipment

Because hydrogen peroxide should never come in contact with organic materials like cloth and leather, it's imperative that workers handling the chemical always wear the appropriate protective clothing. Please check the SDS and PDS for your specific product for details.

| | |
|-----------|--|
| Measure 1 | A protective suit (preferred anti-flammable treated) made of vinyl, neoprene, or PVC |
| Measure 2 | A pair of vinyl or neoprene boots |
| Measure 3 | Protective goggles that fit snugly over the eyes |
| Measure 4 | Vinyl or neoprene gloves |
| Measure 5 | A hard-hat with a full-face shield |

Additional information

Production at all Nouryon sites is in accordance with certified management systems. To receive a copy of the current certificate(s) contact your Nouryon representative. Nouryon representatives will be pleased to discuss in detail the safe handling, application and benefits of Eka® HP. To arrange your personal interview, please contact your Nouryon account representative by calling one of the numbers below.
